

The expectations for what the children are learning in each year, different suggestions on how to teach it

It was useful to see some of the strategies used in maths lessons.

What did you find useful about the session?

Loved the chants the children are learning, especially as my child seems to retain anything they have learnt by singing.

It was lovely to see the new format of how Maths lessons work at Dingle. It was enjoyable and interesting. It was great to see the simple, yet engaging games that can easily be done at home.

Understanding how my daughter now learns maths as it's very different to how I used to.

Lots of parents came and engaged which was great but maybe arrange it into individual year groups rather than two-year groups together.

It's sometimes hard for working parents to attend so maybe one after school.

How could the session be improved?

More guidance on how to problem solve

I thought it was well put together and probably the best parent workshop we have been to.

Found the session really useful
and actually quite fun

Thank you for organising
this, a great opportunity to
gain an insight into ways
we can support at home.

Maths Workshop for Parents

Really happy to see the big
changes happening at Dingle in
all areas and the difference it
has been making to our child's
learning experience. The
session was fun and
informative. Maths is now my
child's favourite part of the
Dingle day and I can see why.
Thank you for a brilliant parent
and child workshop.

I really enjoyed the
session
